Portable

HYGENIC® SIMPLE DAM KIT

The Simple Dam Kit is especially designed to introduce, organize and simplify the process for dentists and staff who want to increase their use of dental dam. The lightweight, portable storage case contains everything required for an easy and quick application of Dental Dam:

- a box of Elasti-Dam, extra elastic powderfree* latex dam or elastic Non-latex Flexi Dam
- template and punch to accurately mark and punch the hole for the dental dam clamp
- four color coded Fiesta® clamps for front, premolar and molar teeth (#2, #9, #12A, #13A)
- forceps to securely place the clamp over the tooth
- a plastic frame to mount the dental dam sheet
- Wedjets® Stabilizer Cord, an elastic floss-like material that can be used instead of clamps to fix the dam

* per EN 455-3:2015<2mg/Sheet & ISO 21171, standards and test methods for medical gloves

Each kit contains an interactive, instructional CD with application tips and shortcuts.

The favourably priced kit costs much less than the sum of its components and is thus an affordable start for students, new users or existing users to expand clinical use.

With the Simple Dam Kit you will easily benefit from use of Dental Dam:

Time saving

Save time through improved visibility and access to the work area.

Quality improvement

The use of Dental Dam improves the properties of many dental materials through moisture control and prevention of cross contamination.

Safety

Dental Dam prevents the patient from aspirating objects and/or materials during the procedure and protects office staff by reducing airborne pathogens created during procedures.

Order Information

HYGENIC Simple Dam Kit w/ Elasti-dam – REF H02900

Elasti-Dam, medium, green (36 pcs.)
